

What city is the home in?

Room area (sq. units) (example 12' x 24')

Ceiling height

Floor Heat Loss (slab) yes or no

Fireplace?

Windows (sq. units) total each window (example 33" x 40")

Skylight - yes or no , if yes size

Exposed walls (in units) (example 3 walls, each wall 12' + 12' + 24')

**Insulation factors: Wall
Floor
Ceiling**

Outside doors (sq. units) (example 60" x 36")

**Glass
Wood**

Which way do the joists run in each room and how many joists are there (example, room is 24' long x 12' wide - the joists are 24' long and there are 10 of them)

What is center joist.

Please include your telephone number for any questions I may have. Do this calculation in each room that you plan on using the ceiling heat.

Let me know if I can assist you with anything else.

Best regards,

**Ann Andrews
